Estonia (country code +372)

Communication of 19.XII.2008:

The *Estonian Technical Surveillance Authority (ETSA)*, Tallinn, announces the updating (Regulation No. 96 of the Ministry of Economic Affairs and Communications, 29 October 2008) of a National Numbering Plan (NNP) in Estonia (Regulation No. 45 of the Ministry of Economic Affairs and Communications, 11 June 2007).

The Estonian Numbering Plan is a closed numbering plan, where geographic area dialling numbers (geographic area codes) are absent.

General changes to the numbering plan:

- Numbering ranges 81 and 82 are open for mobile telephone numbers (81XX XXXX and 82XX XXXX) for the provision of mobile telephone services.
- Numbering ranges from 83 to 85 are reserved for mobile telephone numbers/services in the future.

The procedure for calling Estonia from abroad does not change.

When dialling from abroad to Estonia, after the international access code (international prefix) and the country code of Estonia (+372), the National (Significant) Number (N(S)N) will follow.

The maximum length of an international number is fifteen (15) digits.

**National Numbering Plan
(According to ITU-T Recommendation E.129 (09/2002))**

<http://www.itu.int/itu-t/inr/nnp/index.html>

Administrations are requested to notify ITU about their national numbering plan changes, or to give an explanation on their webpage concerning the national numbering plan as well as their contact points, so that the information, which will be made available free of charge to all administrations/ ROAs and service providers, can be posted on the ITU-T website.

For their numbering website, or when sending their information to ITU/TSB (e-mail: tsbtson@itu.int), administrations are kindly requested to use the format as explained in ITU-T Recommendation E.129. They are reminded that they will be responsible for the timely update of this information.

From 1.XI.2008 to 15.XI.2008, the following countries have updated their National Numbering Plan (NNP) on our site:
