SANC/ISPC Database (ITU-T Recommendation Q.708) (03/1999)

Database gives SANC/ISPC access

Note from TSB

The international signalling point codes (ISPCs) and signalling area/network codes (SANCs) that facilitate all telephone calls are now available to members in [an online database](http://www.itu.int/itu-t/inr/) (www.itu.int/itu-t/inr/).

Previously up-to-date information was only available to subscribers to ITU-T's freely available [Operational Bulletin](http://www.itu.int/itu-t/bulletin/index.html) (www.itu.int/itu-t/bulletin/index.html).

The database provides easier access to the information and also presents it in a machine-readable form.

An ISPC is used in association with signalling system N^o 7 (SS7), and acts in a similar way to an IP address in an IP network. It is a unique address for a node to identify the destination of a message.

The action was taken following a request by ITU-T Study Group 11.

Bahamas (country code +1 242)

Communication of 19.IV.2010:

The *Utilities Regulation and Competition Authority* (URCA), Nassau, announces the activation of new Central Office codes as follows:

NPA	CO Code	Service Provider	Services	Issue Date
242	612	IPSI	Fixed Services	8 February 2010

The complete list of active central office codes are shown in the Detailed Assignment Table.

INTRODUCTION

The Utilities Regulations and Competition Authority (URCA) was established in 2009 with the coming into force of the URCA Act in 2009. The Communication Act 2009 empowered URCA to regulate the electronic communication sector, including the administration of numbering resources. URCA replaced the Public Utilities Commission (PUC) as the regulator in The Bahamas.

The Public Utilities Commission (PUC) took over the responsibilities of the administration of numbering resources from the Bahamas Telecommunications Company Limited (BTC), previously the Bahamas Telecommunications Corporation (BaTelCo), by which time a significant amount of the current central office codes were already assigned.

URCA initiated the development of the National Numbering Plan (NNP) of The Bahamas following a public consultation that was started under the PUC. This NNP has as its prime objective the management of all numbering resources such that licensees may be assigned the resources to deliver high quality services to end users; to foster competition in the sector; and promote social and economic development throughout the country.

The full NNP and associated documents may be viewed and downloaded from URCA's website at www.urcabahamas.bs.

NUMBERING PLAN STRUCTURE

The Bahamas is a member of the North American Numbering Plan (NANP) which is the basic numbering scheme for the public switched telephone network (PSTN) in countries under Country Code 1. These countries are: The Bahamas, the United States of America, Canada, Bermuda, and fifteen (15) Caribbean nations¹.

The NANP structure is in the format:

NXX – NXX – XXXX where: N = 2 to 9 and X = 0 to 9
(ABC – DEF – GHIJ)

¹ The NANP Caribbean countries are shown with their NPAs: Anguilla: 264; Antigua & Barbuda: 268; Barbados: 246; Bermuda: 441; British Virgin Islands (the): 284; Cayman Islands (the): 345; Dominica: 767; Dominican Republic (the): 809/829/849; Grenada: 473; Jamaica: 876; Montserrat: 664; St. Kitts and Nevis: 869; St. Lucia: 758; St. Vincent and the Grenadines: 784; Trinidad and Tobago: 868; and Turks & Caicos: 649.

Canada and the United States each have multiple NPA codes.

The 10-digit format is named as follows:

- The first group of three characters, the ABC digits (NXX format), is the Numbering Plan Area Code (NPA);
- the second group of three characters, the DEF digits (NXX format), is the Central Office Code (CO Code); and
- the third group of characters, the GHIJ digits (XXXX format), is the Subscriber's Line Number.

DIALLING PLAN

The country code for The Bahamas is: "1"

The Numbering Plan Area (NPA) Code for The Bahamas is: "242".

This code is commonly referred to as the area code.

Local number dialling (intra-island) is standardized in the seven digit format as follows:

NXX – XXXX

Domestic Long Distance calls are processed with 11 digits:

1 (242) NXX – XXXX

(The access prefix + NPA + NXX-XXXX).²

International Long Distance calls, within the NANP, are dialled using 11 digits:

1 (NPA) NXX – XXXX

(The access prefix + NPA + NXX-XXXX)

International long distance calls terminating outside the NANP are dialled using the format required by the terminating country. The prefix 01 or 011 may be used depending on the level of assistance required to complete the call.

The prefix "01" is used for operator assisted calls. These would be in the format:

01 + Country Code + Area Code + Telephone Number

The prefix "011" is used for direct dial calls.

011 + Country code + Area Code + Telephone Number

Directory assistance for international calls (within and outside the NANP) may be obtained by dialling "0".

The Bahamas National Numbering Plan (NNP) therefore conforms with NANP administration practices and the relevant International Telecommunication Union's (ITU) Recommendations, e.g., E.164 and E.212.

² In the NANP, the digit "1" is used interchangeably as the country code as well as an access digit.

Since then, a number of notifications have been received at TSB and they have been published separately in various issues of the ITU Operational Bulletin. The present list recapitulates all the different amendments that have been published up to ITU Operational Bulletin No. 956 of 15.V.2010.

2. Recommendation Q.708 states that the assignment of signalling area/network codes (SANC) is to be administered by TSB. Each country will then be responsible for the assignment of international signalling point codes (ISPC) that will then be notified to TSB.

3. The numbering plan of Recommendation Q.708 contains 2 048 SANCs providing for 16 384 international signalling points. From these, currently 1 536 SANCs are available for assignment allowing for 12 288 international points. At present 911 SANCs are assigned; the reported utilization is 5 346 international signalling points.

4. In order to keep the list up to date, administrations are, therefore, requested to notify TSB, by using the notification form attached, as soon as an ISPC assignment or withdrawal is made, www.itu.int/itu-t/inr/forms/ispc.html .

5. This List will be updated by numbered series of amendments published in the ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available on the ITU website www.itu.int/itu-t/bulletin/annex.html .

6. Please address any comments or any modifications concerning this List to the Director of TSB:
