## Mobile Country or Geographical Area Codes (Recommendation ITU-T E.212)

### Note from the TSB

#### Patent involving use of unassigned E.212 MCCs

Communication of 19 November 2010

TSB Circular 87 on Patent apparently involving use of unassigned E.212 Mobile Country Code (MCCs) was issued on 2 February 2010. The patent was filed with the World International Property Organization on 6 April 2005, as number PCT/EP2005/003612.

A previous notice regarding this matter appeared in Operational Bulletin 951 of 1.III.2010.

On the basis of contributions from the membership and discussion, ITU-T Study Group 2 agreed on 18 November 2010 that the practice described in the patent is not consistent with the use of Recommendation E.212 and IMSIs because the Recommendation specifies that such resources (MCC) must be duly assigned by the ITU-T prior to these being used in any system. As the patent relies on resources marked “spare” in the international identification plan E.212 that are likely to be assigned in the future by the ITU-T, such a mechanism must not be implemented in a system that refers to Recommendation E.212.

In particular, Study Group 2 agreed that:

- a) The use of the unassigned international numbering resources as proposed in the patent would contravene basic principles of resource management and E.212 in particular and whether this would be known to those skilled in the art.
- b) The use of numbering resources proposed in the patent is absolutely not workable even though 800-899 and 902-999 are reserved or spare now, in particular because it would not be practical to make almost 20% of the E.212 code space unusable in order to support applications that were developed apparently in contravention of ITU-T Recommendations and procedures.
- c) The patent implicitly does not meet requirements for E.212 international numbering resources for SIMs, for example, the MCC value is preferably associated to a kind of a mobile device, and the MNC value is associated to one or a family of functionalities of such devices.

## Other communications

### Netherlands

#### Netherlands Antilles: islands of Curaçao; Sint Maarten; Bonaire, Sint Eustatius and Saba

Communication of 7.XII.2010:

The Permanent Mission of the Kingdom of the Netherlands to the United Nations Office and other International organizations in Geneva announces as follows.

Up until 10 October 2010, the Kingdom of the Netherlands consisted of three parts: the Netherlands, the Netherlands Antilles and Aruba. The Netherlands Antilles consisted of the islands of Curaçao, Sint Maarten, Bonaire, Sint Eustatius and Saba.

With effect from 10 October 2010, the Netherlands Antilles ceased to exist as a part of the Kingdom of the Netherlands. From that date onwards, the Kingdom consists of four parts: the Netherlands, Aruba, Curaçao and Sint Maarten. Curaçao and Sint Maarten enjoy internal self-government within the Kingdom, as Aruba does.

These changes constitute a modification of the internal constitutional relations within the Kingdom of the Netherlands. The Kingdom of the Netherlands will accordingly remain the subject of international law with which agreements are concluded. The modification of the structure of the Kingdom will therefore not affect the validity of the international agreements ratified by the Kingdom for the Netherlands Antilles: these agreements, including any reservations made, will continue to apply to Curaçao and Sint Maarten.

The other islands that until 10 October 2010, formed part of the Netherlands Antilles – Bonaire, Sint Eustatius and Saba – have become part of the Netherlands, thus constituting ‘the Caribbean part of the Netherlands’. The agreements that until 10 October 2010 applied to the Netherlands Antilles also continue to apply to these islands; however, the Government of the Netherlands is now responsible for implementing these agreements.
