National Numbering Plan (According to ITU-T Recommendation E.129 (11/2009))

Web: www.itu.int/itu-t/inr/nnp/index.html

Administrations are requested to notify ITU about their national numbering plan changes, or to give an explanation on their webpage concerning the national numbering plan as well as their contact points, so that the information, which will be made available freely to all administrations/ROAs and service providers, can be posted on the ITU-T website.

For their numbering website, or when sending their information to ITU/TSB (e-mail: tsbtson@itu.int), administrations are kindly requested to use the format as explained in Recommendation ITU-T E.129. They are reminded that they will be responsible for the timely update of this information.

From 15.V.2011 to 31.V.2011 the following countries have updated their national numbering plan on our site:

<i>Country</i>	<i>Country Code (CC)</i>

**LIST OF ITU CARRIER CODES
(ACCORDING TO ITU-T RECOMMENDATION
M.1400 (07/2006))**

(POSITION ON 1 JUNE 2011)

List of ITU Carrier Codes

Note by TSB

1. As the number of telecom operators in each country is growing rapidly, the number of interconnections between their networks is growing even faster. The standardization of designations of all the network interconnections is therefore of great concern for the operators involved. Only then are they able to do the provisioning and maintenance in a systematic and efficient way.
2. The proper use of ITU-T Recommendation M.1400 requires the identification of the operators sharing the interconnection. To that end an overall list of operators working in a country, with an officially recognized and standardized code for each of them, is of great help. It enables them to identify each other in a comprehensive and unique way. This will eventually result in one integrated database for all connections, in turn improving network operations and administration to the benefit of both providers and clients.
3. Due to liberalization of telecommunications and increased competition in the telecommunications industry, there is a mandatory requirement that telecommunications operators that interoperate be identified. A centralized List of ITU Carrier Codes (ICCs) has been created with the ITU/TSB as the repository. All domestic and international carriers are expected to register with ITU/TSB for a carrier code. Instead of individual operators sending their ICCs to the TSB for registration, the national regulatory authorities are requested to provide the validated codes and related information of domestic network operators directly to the TSB.
4. The ICC list identifies Operators that are recognized by each Member State's Administration. Such a list is provided on the central ITU ICC website at www.itu.int/ITU-T/inr/icc/index.html. The ICCs may be used both for electronic commerce between operators and for designation of resources in their networks. Hence, ICCs can be assigned both to network operators and service providers.
5. This List of ITU Carrier Codes replaces that published as an Annex to the ITU Operational Bulletin No. 739 of 1.V.2001. Since then, a number of notifications have been received at TSB and they have been published separately in various issues of the ITU Operational Bulletin. The present list recapitulates all the different amendments that have been published up to Operational Bulletin No. 981 of 1.VI.2011.
6. This List will be updated by numbered series of amendments published in the ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available on the ITU web site www.itu.int/itu-t/bulletin/annex.html.
7. Please address any comments, suggestions or new assignment concerning this List to the Director of the TSB:

8. The designations employed and the presentation of material in this List do not imply the expression of any opinion whatsoever on the part of the ITU concerning the legal status of any country or geographical area, or of its authorities.

Notification Form for List of ITU Carrier Codes

For Operators utilizing ITU-T Rec. M.1400, Operator ID or ITU Carrier Code (ICC) is mandatory in the revised Layer 1 structure to identify route terminations, beginning 1 January 2004. An ICC is mandatory for interconnections between operators in different countries and different operators in the same country. This code is used in ITU-T Rec. M.1400 Layer 1 records to uniquely identify route terminations as well as for the purpose of an Operator registering its interconnecting Operators.

In order to develop a listing of ICCs that may be used to identify the interconnecting operators in ITU-T Rec. M.1400 records, as explained in ITU-T Rec. M.1400, national regulatory authorities are requested to provide the validated codes and related information for both international and domestic operators directly to the TSB using the following form.

1. **Company full name:**
(the name of operator)

2. **Company Code:**

--	--	--	--	--	--

(The code by which the operator wishes to identify itself. This code should be of alphabetic (A to Z) or numeric (0 to 9)), six or less in length, and shall be a unique identifier of a network operator/service provider within each country. This code may be one that is in use today, provided it fits the definition.)

3. **Company official address:**
.....
.....
.....

4. **Contact point:**
Tel.: +
Fax: +.....
