

Ben Freyens (PhD Economics, 2007, Australian National University) is Associate Professor of Economics at the University of Canberra and a Research Associate at the Centre of Law and Economics, Australian National University. His research interests include the economics of employment protection, radio spectrum policy, inequality and poverty, and some specific questions in human capital-, social capital- and agricultural policy. He has conducted several research projects for the Australian Communications and Media Authority on optimal spectrum licensing and radio transmission technologies. His research has been published in leading economics journals such as *Economics Letters*, *Information Economics and Policy*, *Journal of Economic Behavior & Organization*, *Journal of Public Economic Theory*, *Review of Economics and Statistics*, and *Telecommunications Policy* and in a number of IEEE publications (engineering). In his earlier working life, he was a statistical expert for the European Commission, and later taught economics at Deakin University, at University of New South Wales and at University of Wollongong.
