Digital Health : WHAT AND WHY

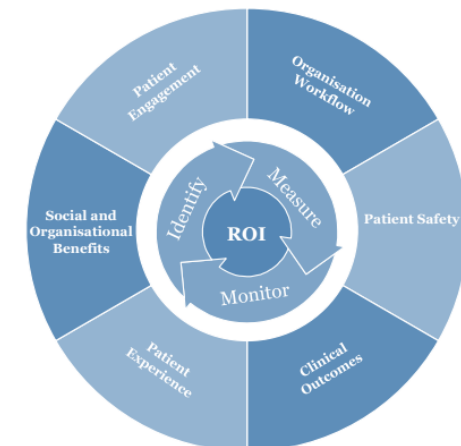

Digital health (convergence of digital technologies for health) is the *Enabler* to better health care to every citizen in your country

Works!

- Proven results on +ve health outcomes
- Applied across Emergency care, Hospital care, PHC, Home and Rehab care, Citizen and Community care and beyond...

Pays off!

- Helps save health budget costs
- Proven to provide higher return on investment

**Healthier
Happier
Productive
citizens**

Enables!

- Creates enabling infrastructure for health care continuity including during emergencies
- Evidence-based technologies and innovation to be scaled in the most effective and sustainable way

Achieves!

- Achieve the Sustainable Development Goal 3 – Health4All and GPW13 targets.
- Facilitates equity in health care, leaving no one behind

S01.

Promote **global collaboration** and advance the **transfer of knowledge** on digital health

S02.

Advance the **implementation** of national digital health strategies

Global Strategy on Digital health 2020-2025

S03.

Strengthen **governance** for digital health at global, regional and national levels

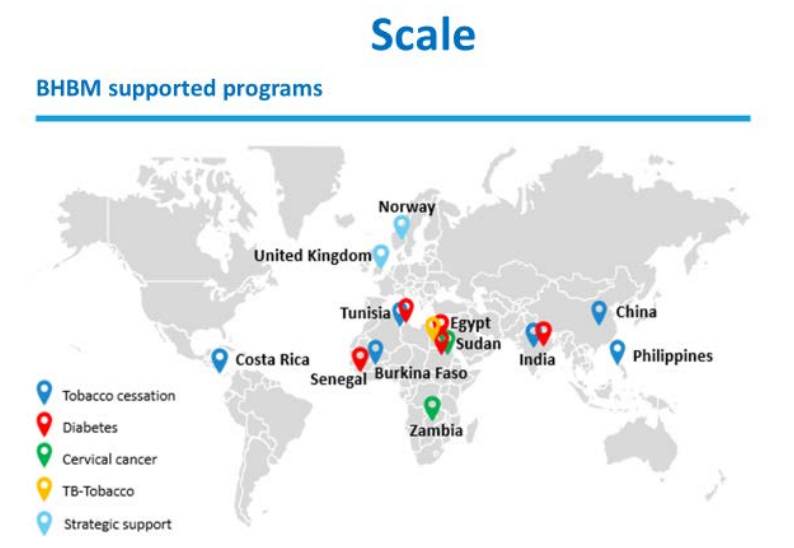

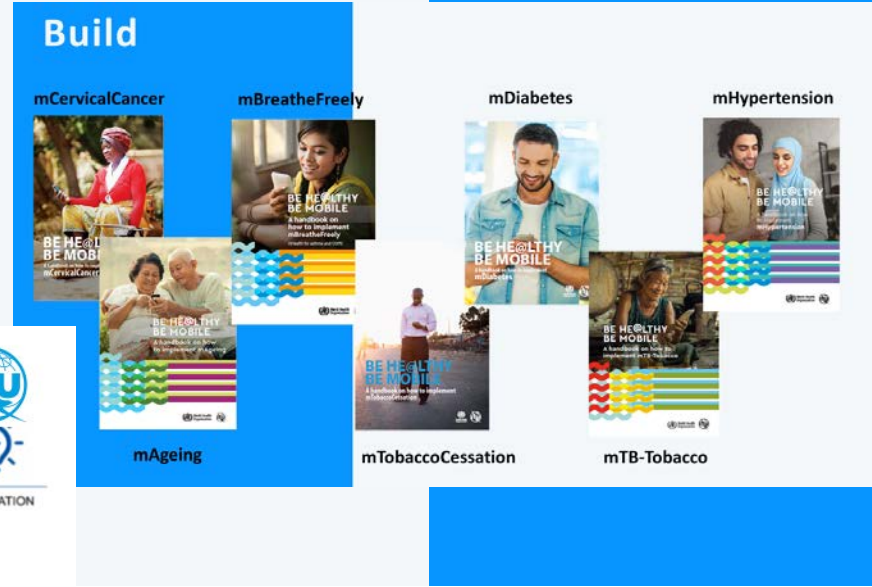

S04.

Advocate **people-centred health systems** that are enabled by digital health

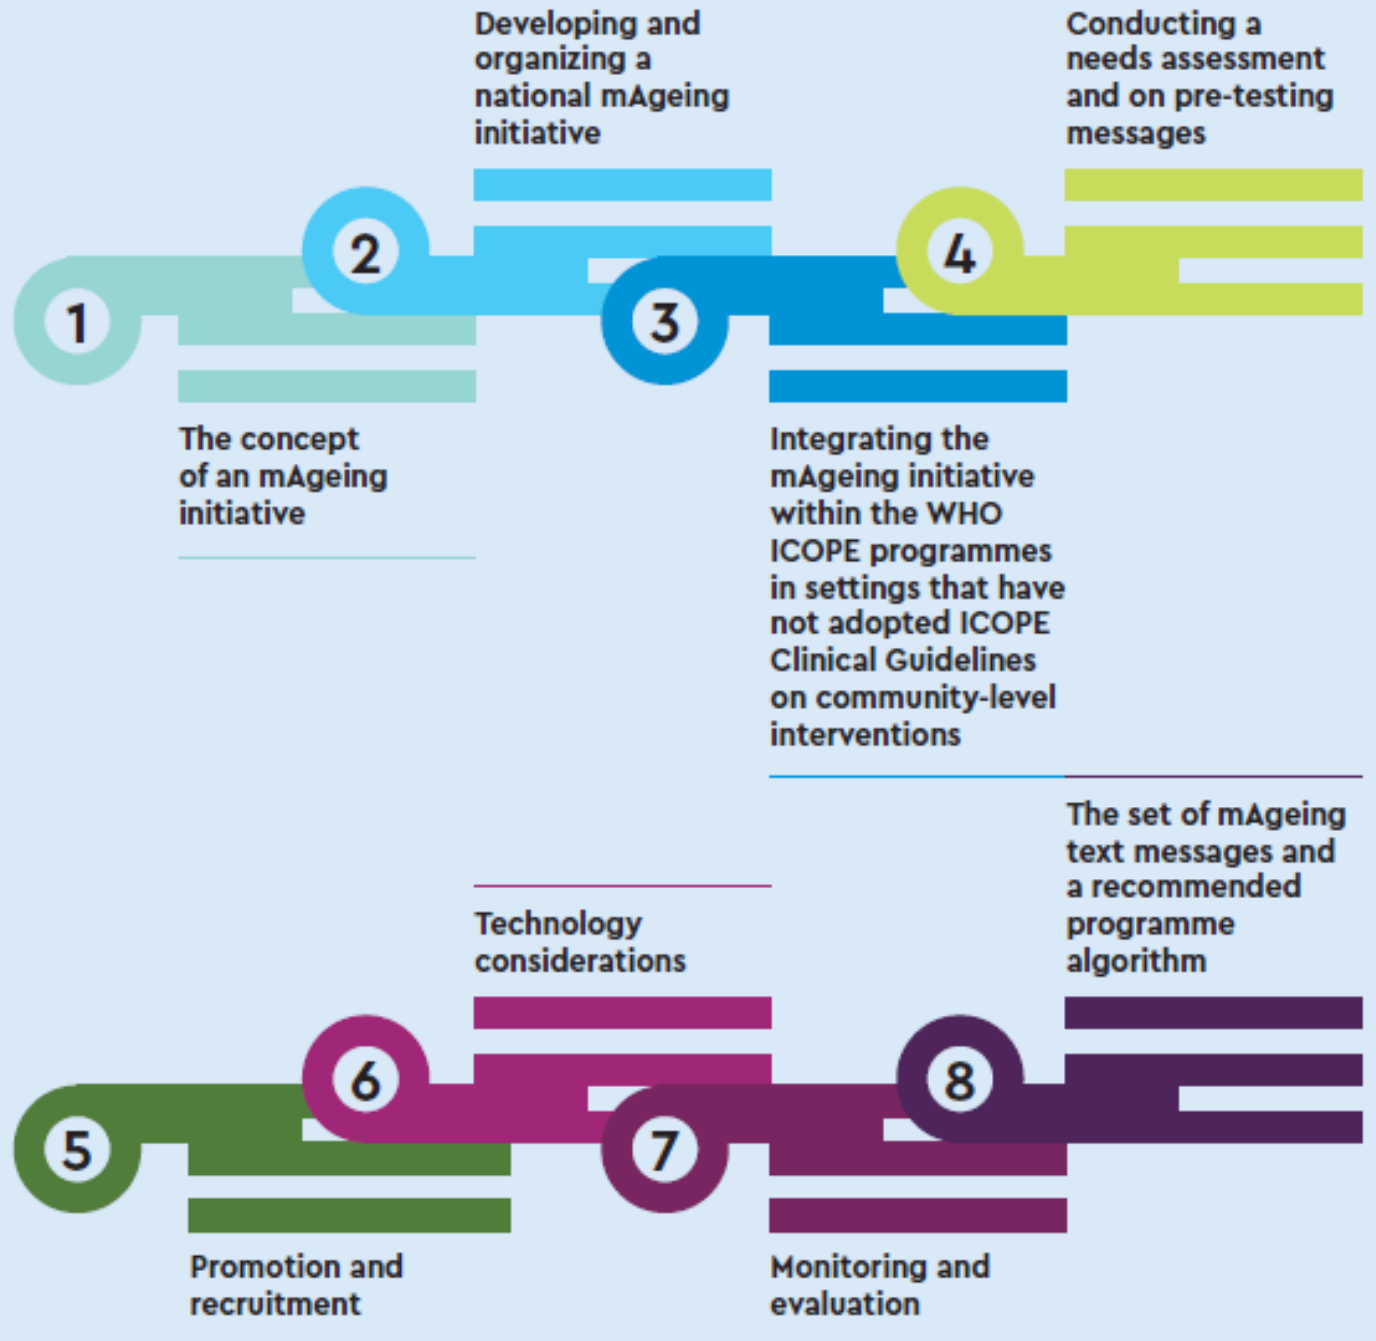

BHBM (Joint program of WHO , ITU and Countries) ...

has three main functions:

- Build
- Enable
- Scale

Build: mAgeing an example:

“Today Digital health is tomorrows
health

We must ensure the Digital Health
revolution is safe, sustainable
and leaves no one behind”

THANK YOU!
