- Load balancing
- Maintenance operations

Benefits of a unified approach to threat management

Consolidated reporting on the state of a network and associated infrastructure

Can be deployed in smaller remote locations that would otherwise be held back by a lack of specialized security staff

security controls can be selected as needed

□ ability to scale to the organization's needs

Summary

UTMs are easy to use

 UTMs can be deployed to scale to the changing needs of growing networks, including demands for remote network management

Selecting the proper UTM requires attention to a number of details, such as:

- Understanding the security services needed and their locations
- UTM performance
- Maintenance and management, especially with regard to remote locations
