

# Norway Health Tech

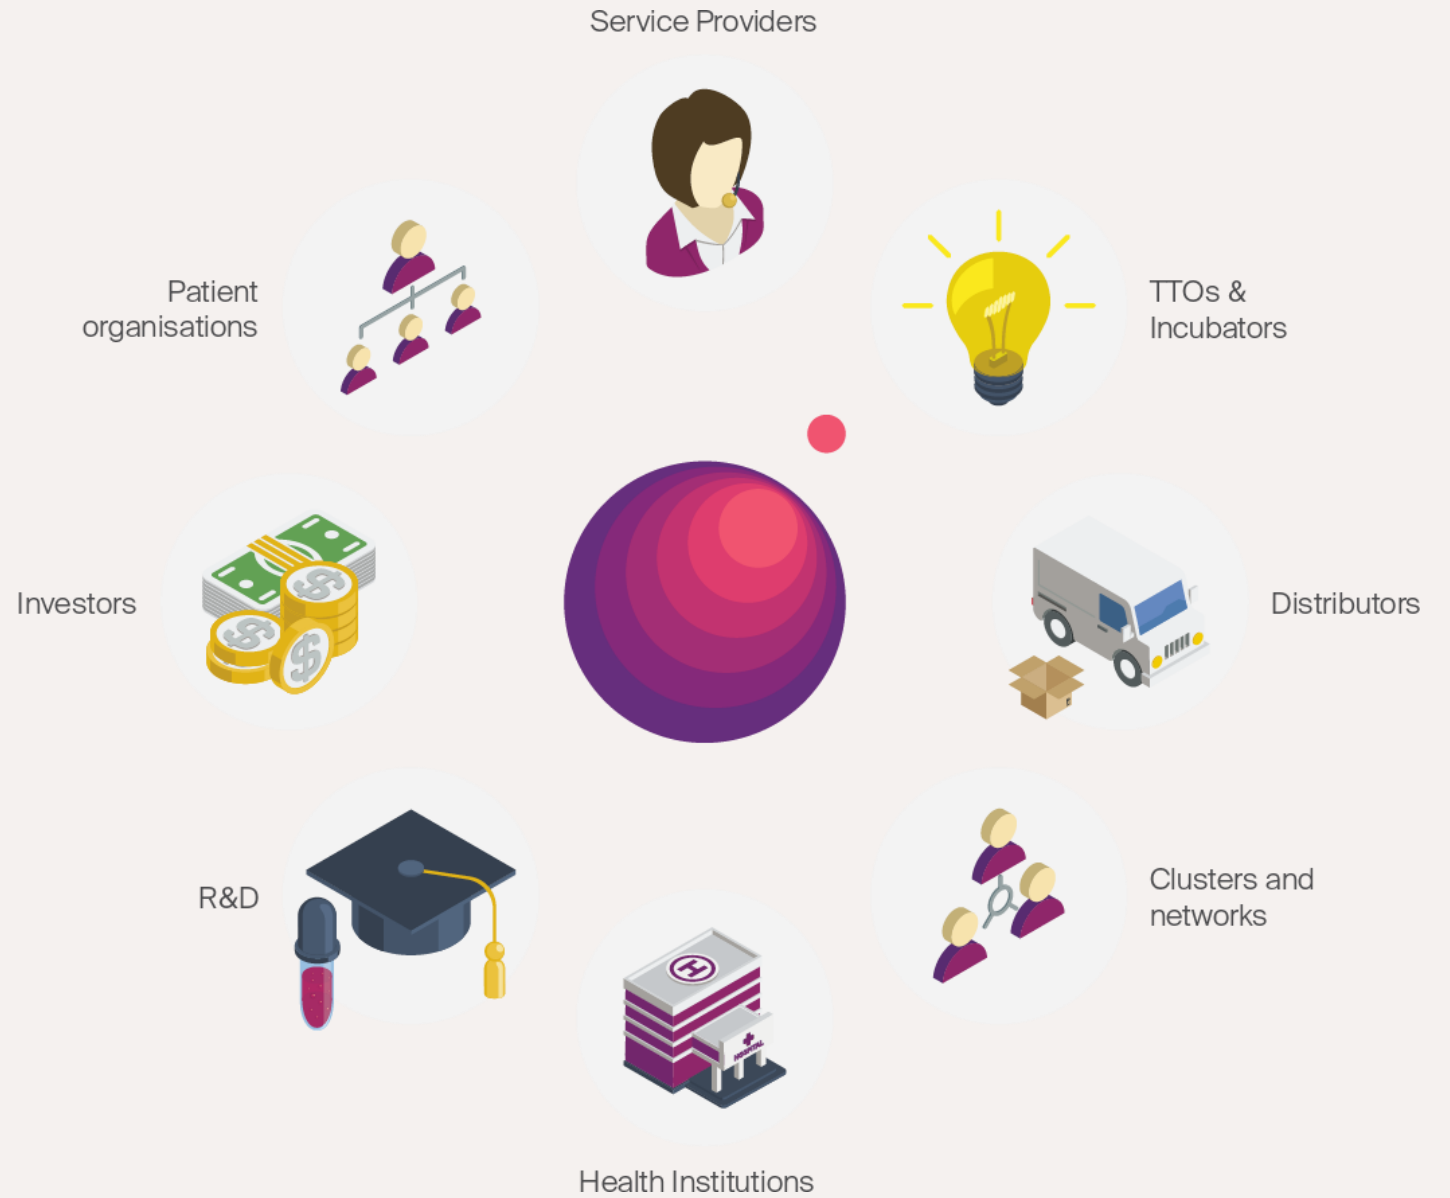

# The story behind

# We address all areas of human health

# Our members represent the full value chain

# The health innovation collaborative ecosystem

**The Health Ministry and regional health administration**

**Health Industry**

**Health Care Providers**

**Health Service Innovation  
Acceleration**

**University research and education  
collaboration**

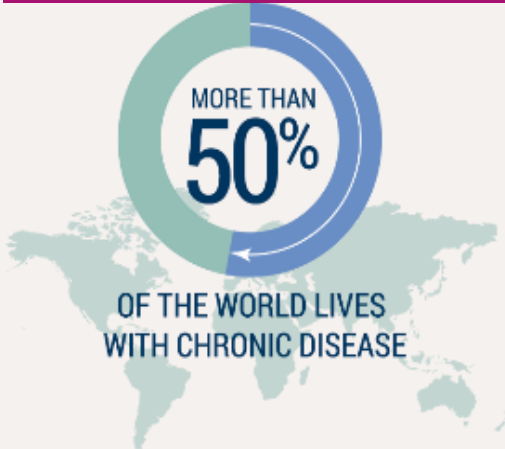

# Challenges in healthcare lead to a need for new products and services

Less hands  
in healthcare

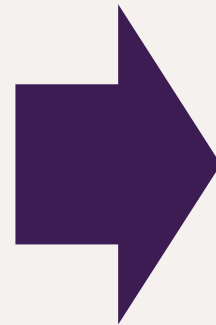

Demographical  
changes

Increased occurrence  
of chronic disease

Norway no 4 on OECD  
spend per capita/GNP

Need for new  
products and solutions

# Challenges in health care and in introducing new health technology

- Less hands in healthcare
- Rise in chronic disease occurrences
- Culture and silos
- Demanding patients
- Pace for change

- Private capital
- Access to clinical testing facilities
- Pilots not leading to new routines
- Who owns the process? Who can make decisions?
- Pace for change

**Who owns the full process?**

# Norwegian assets in health

Strong R&D,  
knowledge and  
data bases

Well established  
health systems  
and testbeds

Competence  
and Technology

Early adaptors,  
stable economy  
and trustful  
relations

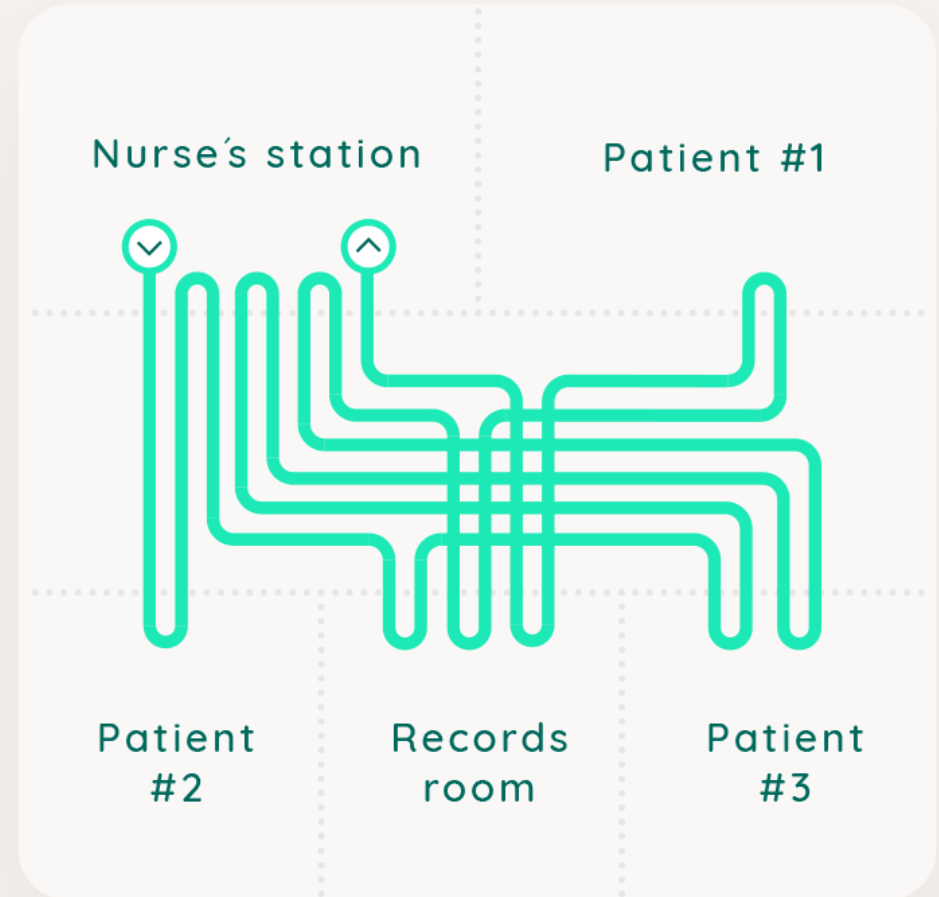

# Improving workflow in the hospital

- Time and energy waste in Norwegian hospitals due to lack of implemented technology
- Diffia is making it «nimble»

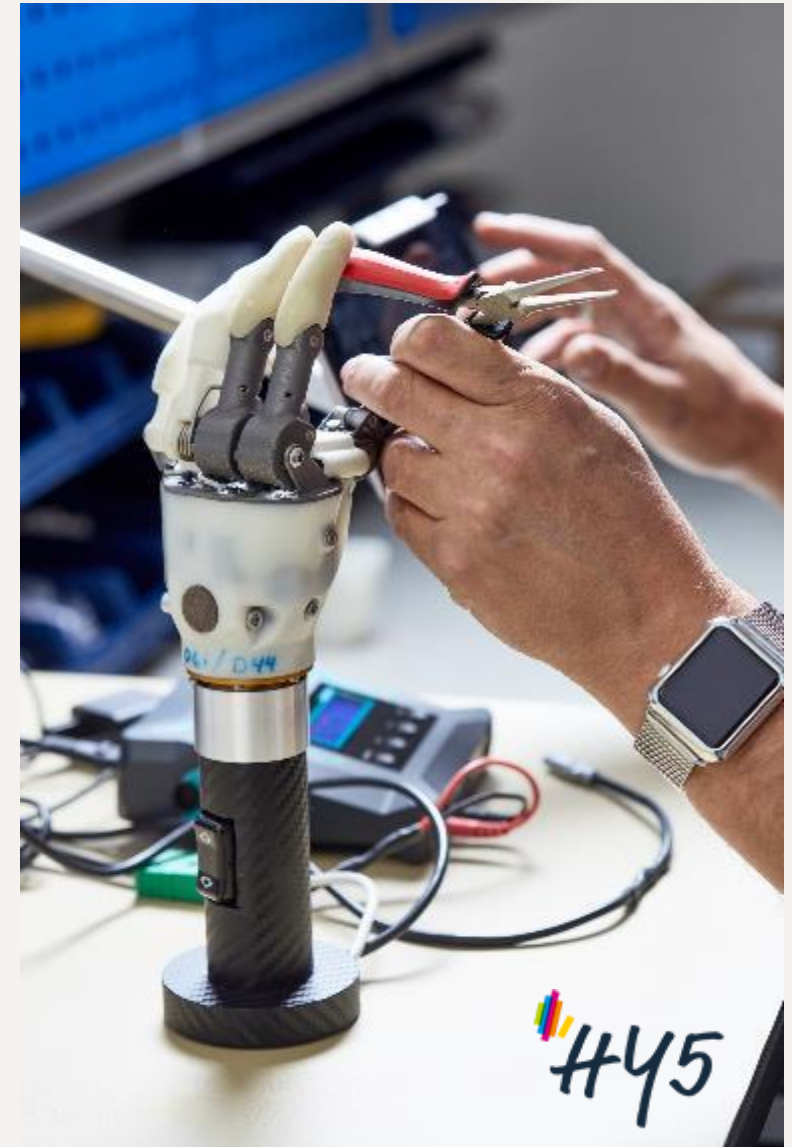

## Current workflow

## Making things more cost effective: 3D printing

Enables production of extremely complicated body parts, gives high return on capital

Super-absorbent bio degradable sheet for use in hospitals; during child delivery, for cancer patients – any situation where liquid is an issue

**Better for the patient, the hospital and the environment!**

# EpiGuard

The EpiShuttle is a single-patient isolation system, specially designed for transport of patients.

The unit protects the environment from an infected patient, but can also be used to protect the patient from a contaminated environment.

**Safe transportation for patient and care personnel**

®

**EPI GUARD**

Medical isolation and  
transportation systems

Surgery preparation by using cutting edge technology combined with competence and experience

OUS The Intervention Centre
