

Advancing Accessibility Implementation in Europe

**Shadi Abou-Zahra, World Wide Web Consortium (W3C)
W3C Accessibility Strategy and Technology Specialist
@sabouzah**

W3C Web Accessibility Initiative (WAI) works on:

- Ensuring accessibility support in W3C technologies
- Creating guidelines for web and digital accessibility
- Developing methods for conformance evaluation
- Providing resources for education and training
- Ensuring harmonized and coordinated standards

Web Accessibility

1 November 2017 to 31 October 2020 (GA 780057):

- Accessibility Conformance Testing (ACT) Rules
 - Harmonized testing approaches for WCAG 2
- Demonstrator observatories Portugal & Norway
 - Adoption of authoritative testing approaches
- Supporting tools, resources, and outreach effort
 - Open source tools for testing and reporting

1 January 2019 to 31 December 2021 (GA 822245):

- Open curricula and video-based training materials
 - For developers, designers, authors, managers
- Improved accessibility support in authoring tools
 - List of authoring tools supporting accessibility
- Improved accessibility support in emerging techs
 - Real-time communication, immersive, IoT, ...

Curricula Outline

	Developer	Designer	Author	Tester	Manager
Level 1	Introduction to Web Accessibility
