Universitat Autònoma de Barcelona

XR Access

A community dedicated to making augmented and virtual reality accessible to people with all abilities.

Get Involved - Join an XR Access Working Group!

Working Groups bring together researchers, technologists, and advocates to focus attention on specific issues. Groups work remotely and in person to move the goals of the XR Access community forward.

Interested in participating? Email info@xraccess.org to join a group.

Guidelines & Policies

Develop best practices for the community, collaborate with standards organizations, and help define what "accessible" means in XR.

Awareness & Outreach

Promote cross-sector visibility of accessibility efforts, support community capacity-building, and develop centralized resources.

Education

Build awareness of XR accessibility in educational contexts, and consider ways to design XR technologies that are accessible to all students.

Application Accessibility

Explore how new technologies can support accessibility, and promote the creation of interfaces that incorporate innovative uses of enabling tech.

Hardware Devices

Explore new technologies and support the development of enabling features in XR hardware and devices across platforms.

Content & Authoring

Consider how producers, designers, and developers can create accessible XR content, promote accessible content creation tools.

TVX / IMX is the leading international conference for presentation and discussion of research into interactive media experiences. The conference brings together international researchers and practitioners from a wide range of disciplines, ranging from human-computer interaction, multimedia engineering and design to media studies, media psychology and sociology.
