NATIONWIDE EDUCATION NETWORK (OSE) IN POLAND

Internet access in schools - 2017

Almost **10%** with
no access
Only **10%** with access
to **>100** Mbps

The idea of OSE (Ogólnopolska Sieć Edukacyjna)

OSE provides **FREE OF CHARGE**:

- Internet access services of at least 100 Mbps symmetrical
- advanced cybersecurity measures
- assistance to digital skills' development

VIA a virtual network based on dedicated core and leased lines

On VOLUNTARY basis

22 500 schools

600 000 teachers

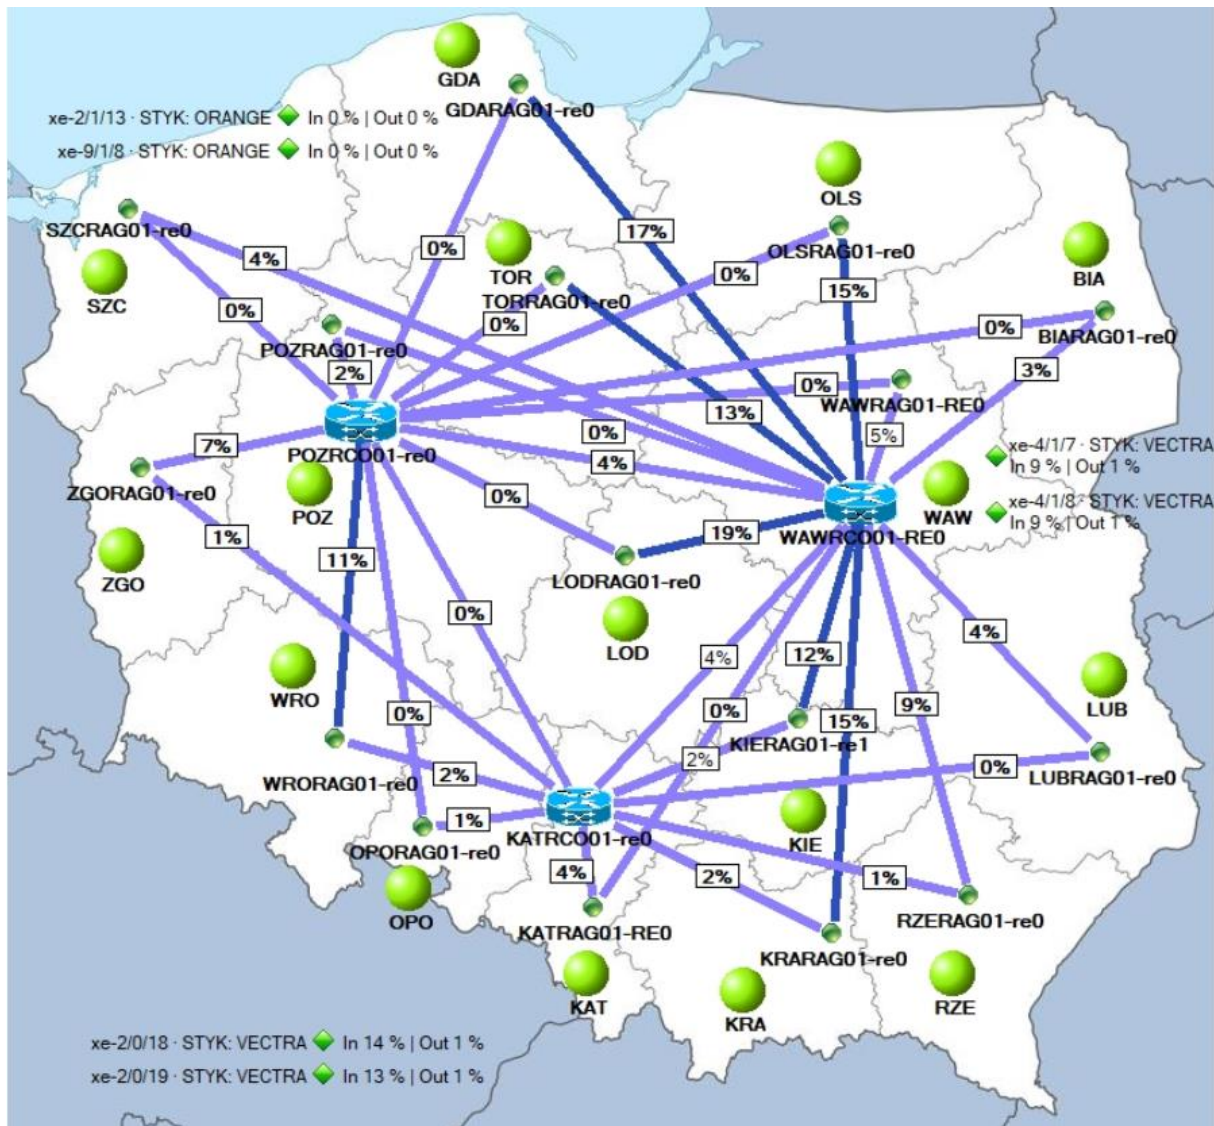

5 000 000 students

OSE core network & Internet security

Most essential tasks:

- IP/MPLS core network deployment
- OSE security systems deployment (Anti-DDOS, Web filtering, contents filtering, parental control etc.)
- Cloud computing
- Operations Support Systems

~100 tasks amounting to ca. 130 MLN EUR

OSE core network

- 16 regional nodes
- 3 central nodes

OSE Internet access services

56 nationwide tenders

Acquisition of last mile & transit lines

284 interconnections

585 line-lease contracts
~25 MLN EUR annually

Internet access in schools - 2021

ALL schools with
access to internet

OSE Internet access services - 2021

20 000

schools subscribed

18 000

schools with active OSE service

19 000

schools ready for the service

2 000

services are being activated

~2 000

schools still may subscribe

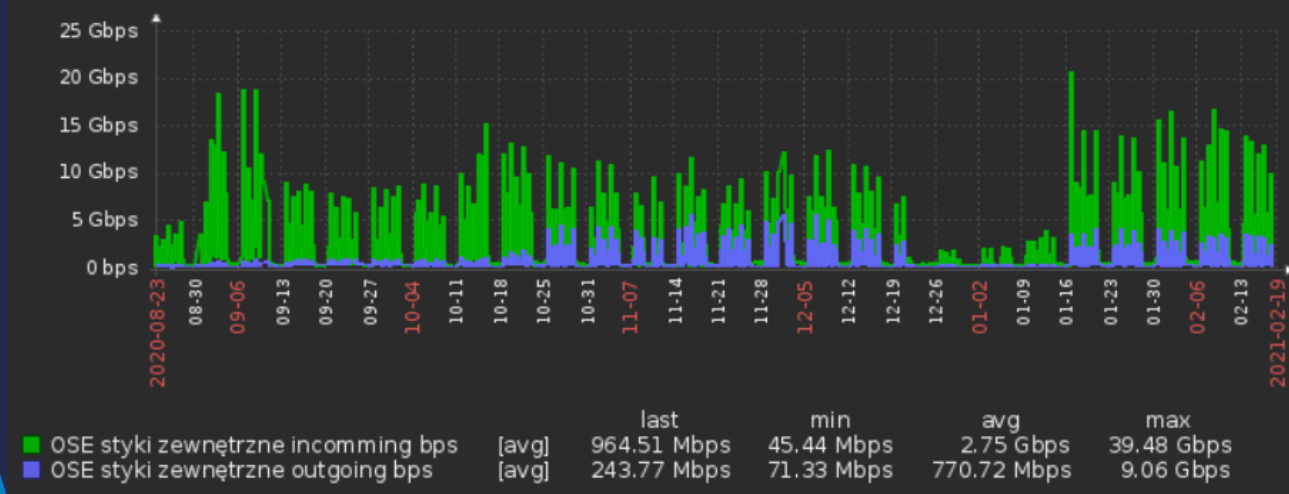

Subscriptions **still open**

OSE services monitoring – data consumption

- Avg. data flow (daily)
17Gbps DN/4Gbps UP

- Avg. school (daily)
0,38 Mbps DN/0,15 Mbps UP

- Avg. school (monthly)
6,39 GB DN/2,83 GB UP

Ruch w sieci OSE od 09/2020

OSE security measures - 4 levels:

- I – Firewall, prohibiting access to certain webpages considered as basic threats
- II – Antivirus and Web filtering, dynamic analysis of threats based on reputational data

LVL I
Firewall

LVL II
Antivirus & Web filtering

OSE security measures cont'd:

- **III** – data flow monitoring, dynamic analysis of contents (text, audio, video), detection of threats (incl. cyberbullying or data potentially noxious for students healthy development)

- **IV** – parental control app on smartphones

Each school voluntarily chooses the extent to which the security measures are implemented

LVL III
Dynamic analysis of contents

LVL IV
Personal devices

OSE COVID-19 additional measures (homeschooling):

GOV.PL/ZDALNELEKCJE

A webpage sharing educational contents & tools, launched as a single contact point to help teachers & students maintain the implementation of curricula during homeschooling

- **127 MLN** views
- **4,5 MLN** active users
- **8 500** lessons scenarios for different subjects & grades
- **39 300** electronic contents & tools for homeschooling

Devices for schools in need

12 800

laptops

60 000

tablets
