REVUE MENSUELLE DE L'UNION INTERNATIONALE DES TÉLÉCOMMUNICATIONS — 15 MAI 1965

NAPOLEON III — P

## RÈGLEMENT TÉLÉGRAPHIQUE (REVISION DE PARIS, 1949)

ANNEXE A LA  
CONVENTION INTERNATIONALE  
DES TÉLÉCOMMUNICATIONS  
(ATLANTIC CITY, 1947)

### PROTOCOLE FINAL AUTRE RÉGLEMENT

GENÈVE  
SECRETARIAT GÉNÉRAL DE L'UNION INTERNATIONALE  
DES TÉLÉCOMMUNICATIONS  
1949

#### CREDENTIALS

AS the Government of the Republic of Eswatini desires to be represented at World Administrative Radio Conference to be held in Geneva from 2nd to 8th March 1967,

WHEREFORE these Presents are to signify that the persons whose names hereunder have been duly appointed as Representatives having Full and Authority to represent the Government of the Republic of Eswatini at said Conference in the capacities respectfully indicated:-

- MASHIGIDI - Assistant Director  
Telecommunications Executive  
(Head of Delegation)
- MASHIGIDI - Head Transmitter  
Eswatini Broadcasting Corporation  
(Delegate)

IN WITNESS WHEREOF, I have signed these Presents and affixed hereto the seal of my Office.

4 THESE this 24th day of January, one thousand nine hundred and sixty seven.

Notiz. n° 305

Monsieur le Directeur,

Nous avons l'honneur de porter à votre connaissance qu'il y a lieu de faire modifier, comme suit, dans les notifications, le prochain tableau des "voies de communications actuellement interrompues", en ce qui concerne le câble Constantza - Istanbul.

Câble Constantza-Istanbul ..... 31.1.1935... Les télégrammes sont acheminés normalement, sans retard, par sans fil ou par fil.

Veuillez agréer, Monsieur le Directeur, l'assurance de notre haute considération.

DIRECTEUR  
*G. Jancz*

Chef du service  
*G. Jancz*

Mr. Angel Galarza Gago, Vice-President of the Conferences

ad acta

ADMINISTRATIVE  
DES LIGNES TÉLÉGRAPHIQUES  
SERVICES EN COMMUN

Christiana le 21 Décembre 1908

Monsieur le Chef,

J'ai reçu votre circulaire en date du 22 de ce mois, par laquelle vous me faites l'honneur de m'avertir que le Bureau international des Administrations Télégraphiques est en fonction à partir du 1<sup>er</sup> Janvier 1909 sous la direction de Monsieur le Directeur Carlsberg.

Je m'empresse de vous faire savoir que la franchise de poste existe en Norvège pour les Correspondances relatives aux affaires Télégraphiques. L'Administration norvégienne accepte donc avec joie la réciprocité offerte par votre Département et je serai très reconnaissant des communications ultérieures que le Bureau international pourra bien faire à mon administration sur l'application de la même franchise de poste aux correspondances Télégraphiques respectives.

À Monsieur le Chef du Département des Postes  
*Berne.*

- Radio
- Telecommunications

# Constitution & Convention

## CONVENTION.

*Les Etats qui ont participé à la Convention télégraphique internationale conclue à Paris le 17 Mai 1865 et révisée à Vienne le 21 Juillet 1868, ou qui ont successivement adhéré à cette Convention, ont résolu d'y introduire les améliorations suggérées par l'expérience. A cet effet, les délégués soussignés se sont réunis à Rome, et, conformément aux dispositions de l'article 62, ont arrêté d'un commun accord, sous réserve d'approbation, les stipulations suivantes, applicables à partir du 1<sup>er</sup> Juillet 1872.*

### TITRE PREMIER. DU RÉSEAU INTERNATIONAL

#### ARTICLE PREMIER.

Les Hautes Parties contractantes s'engagent à affecter au service télégraphique international des fils spéciaux, en nombre suffisant pour assurer une rapide transmission des dépêches.

Ces fils seront établis dans les meilleures conditions que la pratique du service aura fait connaître.

Les villes entre lesquelles l'échange des correspondances est continu ou très-actif seront, successivement et autant que possible, reliées par des fils directs, d'un diamètre d'au moins cinq millimètres, et dont le service demeurera dégagé du travail des bureaux intermédiaires.

The basic legal instruments governing ITU, from 1865 to Present.

## IMAGES FROM THE PAST

ITU's work in the area of radio communications began in 1906 when the first International Radiotelegraph Conference gathered 29 maritime states in Berlin to sign the International Radiotelegraph Convention. The Bureau of the International Telegraph Union (ITU) was designated by the Berlin Conference to act as the central administrative organ for a variety of tasks arising from the Convention.

In 1927, the International Radiotelegraph Conference in Washington established the International Radio Consultative Committee (CCIR) to study technical and operating questions related to radio communications and to issue recommendations on them.

In 1947, at the joint International Telecommunication Conference and International Radio Conference in Atlantic City, the International Frequency Registration Board (IFRB) was created to act as an administrative body to regulate the use of frequencies.

In 1992, the Union's Additional Plenipotentiary Conference in Geneva undertook a reform of ITU to give the Union greater flexibility to adapt to an increasingly complex, interactive and competitive telecommunications environment. ITU's three main areas of activity were organized in "Sectors": telecommunication development, radiocommunications, and telecommunication standardization. The CCIR was renamed the Radiocommunication Sector (ITU-R).

The Radiocommunication Bureau (BR) is the secretariat for the Sector. Created on 1 March 1993, it resulted from the fusion of the Secretariats of the former International Radio Consultative Committee (CCIR), and the International Frequency Registration Board (IFRB). It also included the Maritime Mobile document services, Radio Regulations and Associated Administrative Matters formerly of the ITU General Secretariat.

# International Radio Conference (Atlantic City, 1947)

16 May - 2 October 1947 - Atlantic City , United States

On September 16, 1946 the United States government requested that the Bureau of the International Telecommunication Union invite members of the Union to a plenipotentiary conference in Atlantic City. The International Telecommunications Conferences took place in Atlantic City beginning with the International Radio Conference, which convened on 15 May 1947, and the International Telecommunication Conference, which was held simultaneously beginning on 1 July 1947. One of the first actions of the International Telecommunication Conference was to approve the Rules of Procedure as well as assess the participation of a number of uninvited countries. In particular, Spain was not admitted to any of the Atlantic City conferences while under the rule of Franco.

Changes were made to the Frequency Allocation Table including the decision to identify a place on the frequency spectrum for radionavigational service. In addition, the Cairo Regulations would be broadened to include allocations for aeronautical mobile service and high frequency broadcasting. A band was assigned for the development and use of experimental long distance radionavigation systems. A frequency was assigned for maritime mobile radio-telephone to be used for calling and distress purposes. Finally, a decision was made to relocate bands available to amateurs by moving them from the worldwide band to the 30-10,500 Mc/S band.

The International Frequency Registration Board (IFRB) was created to act as an administrative body to regulate the use of frequencies. It was created at the International Radio Conference and approved by the International Telecommunication Conference. The creation of the IFRB introduced an entirely new type of administrative body and new concept in the regulation of radio to the Union. The IFRB would create a master frequency list that would enable the notification and registration of frequency use to be tracked. In addition, the IFRB would notify member countries of new registrations giving them an opportunity to raise concerns and objections. The registration of a new frequency would be completed if it conformed with all provisions of the Regulations. A working group was created to draw up procedures for the IFRB including its duties: the notification and registration of frequencies, undertaking studies and recommendations on frequency usage and the cancellation of frequency recordings. The IFRB would have eleven members from four areas of regional representation: Americas, Western Europe and Africa, Eastern Europe and North Asia and the rest of the world. Furthermore, the members of the IFRB were to be free of outside influence. They were not on the board to represent their country, but an international public trust. The IFRB would be brought into existence on 1 January 1948; however, the representatives for the IFRB were elected at the conference and held their first meeting on September 30, 1947. A committee convened and examined the frequencies that were in use, but also the frequencies that were needed. This committee also examined and determined the directives for the International Frequency List. It was decided that work on a new International Frequency List would continue after the conference. Following the International Radio Conference the IFRB would work with the Provisional Frequency Board to create a new International Frequency List that would be compiled based on engineering principles.

The use of Class B (Spark) emissions was forbidden except for emergency use aboard ships, lifeboats and other survival craft equipment. Article 33 of the Regulations introduced two important changes: provisions were included that would allow aircraft to use a certain number of frequencies in the maritime service; and, the maritime frequency bands would be sub-divided into three categories: calling, passenger-ship working and cargo ship working. Regarding procedures in aeronautical service, it was decided that the International Civil Aviation Organization and other international aeronautical organizations would assume the responsibility for procedures and regulations related to aeronautical communication. However, ITU would continue to maintain general procedures regarding distress signals. The rates for aeronautical service were raised so that the cost of radiotelegraph rates for aircraft would conform with ship charges.

# Administrative Regulations Collection

ITU's Administrative Regulations contain provisions of a technical nature governing international telecommunications. The purpose of the Regulations is to ensure the efficient operation of international telecommunication services. They complete the provisions of the Constitution and Convention and are binding on all Member States.

This digital collection includes all editions of the various Regulations produced by ITU since 1865.

Telegraph Regulations, 1865-1973

Telephone Regulations, 1885-1973

Radio Regulations, 1906-present (and Additional Radio Regulations, 1927-1979)

International Telecommunication Regulations (ITRs), 1988-present
