Modification of characteristics

- According to **No.9.2**, amendments to the information for NGSO filing that requires a **new API** are:
 - **Additional frequency band**
 - **Modification of the direction of transmission**
 - **Modification of reference body**

Reminders before submission

- Note that frequency assignments in **notification must be covered by** frequency bands in **API**, therefore avoid submitting a very narrow frequency band at the API, in case there is a change needed during the comments/consultation process
- Always run validation tools_ **SpaceVal** before submission, make sure no fatal error
- Reminder to change the file extension from **.mdb** to **.ITU** before sending them to the BR
- As far as possible, submit **one notice** in **one mdb** file
