## eQry

### Exercise no. 2: Notice generation

Objective: Create a new FM station for site BITAM (Gabon) on 89.6 MHz, vertical polarization, using the data from an existing station.

1. Set selection criteria for given site name and administration
2. Retrieve the data
3. Further restrict the choice so you retrieve only one record (filter by assignID)
4. Retrieve the data
5. Generate e-notices (Export to SGML).
6. Wait for the email notification informing about job completion
7. Go to eTools, Notice Generation
8. Download and save the generated file
9. Submit the file to the Online Validation.
10. Why is there an error message?
11. Correct the file, by using the assigned frequency mentioned above
12. Save the file and remember where you stored it for the GE84 workshop 😊
