SELECTED PAPERS FROM THE
ELEVENTH ITU KALEIDOSCOPE ACADEMIC CONFERENCE

Mostafa Hashem Sherif Kai Jakobs Christoph Dosch Alessia Magliarditi Yoshitoshi Murata

This special section originally presented at the Eleventh ITU Kaleidoscope Academic Conference, held in Washington, DC, in December 2019. The Institute with the collaboration of WHO. There are more details at the venue or on the web. The proceedings are available at <https://www.itu.int/ITU-T/education/academic/2019/>. The IEEE Xplore Digital Library conference are available at <https://ieeexplore.ieee.org/abstract/document/91492>.

The topic of the special section is "The Digital Transformation." The Eleventh ITU Kaleidoscope Academic Conference 2020, running from 6 to 10 September 2020, was held in various time zones. The main page at <https://www.itu.int/ITU-T/education/academic/2020/>.

The ITU Kaleidoscope started in 2008 to promote the discussion of Information and Communications Technologies (ICTs) relevant standards. Participants include students, engineers and futurists.

The first article in this special section (ML) and Artificial Intelligence challenge is that, beyond clinical conditions, results that practitioners can corrupt thought only assuming that

This special section presents an updated version of the paper that won the first prize award in the ITU (International Telecommunication Union) Kaleidoscope conference (K-2020).

This conference was the twelfth in the series, this time focusing on "Industry-driven digital transformation." The conference was technically co-sponsored by the Institute of Electrical and Electronics Engineers (IEEE) and the IEEE Communications Society (IEEE ComSoc). In addition, the IEEE Technology and Engineering Management Society (TEMS) also gave its support.

Initially, the plan was to hold the conference in parallel with the ITU Digital World, formerly known as ITU Telecom World, in Hanoi, Vietnam from 6 to 10 September 2020. The Covid-19 pandemic forced a change in plans, so the conference was held online later in the year, from 7 to 11 December 2020. To accommodate various time zones, the daily proceedings were limited to about four hours and the conference was stretched to five days instead of the original three. With all these changes, the 2020 Kaleidoscope was an opportunity to experiment with on-line conferencing and socializing. In particular, the ITU tool/platform, MyMeetings, provided a matchmaking function to give participants with similar interests the possibility of interacting online. Breakout rooms were arranged in the form of "virtual coffee breaks" for smaller group interactions. During these breaks, participants could move freely from one room to another. The Mystery Coffee tool (<https://www.mysterycoffee.com>) was also available for participants to partake in randomly arranged one-on-one virtual meetings. Each day, the ITU staff held a training session and remained available throughout to answer queries and provide assistance.

The on-line conferencing format allowed the participation of those who would not have afforded the cost of travel. In fact, there were about 150 participants connecting from 41 countries spread around the globe. Yet, the experience confirmed that online conferences cannot replace face-to-face events, because the spontaneity and camaraderie of physical presence were sorely missed.

BEST PAPER FROM THE
TWELFTH ITU KALEIDOSCOPE ACADEMIC CONFERENCE

Mostafa Hashem Sherif Kai Jakobs Christoph Dosch Alessia Magliarditi Yoshitoshi Murata

As described in the conference report (https://www.itu.int/en/ITU-T/academia/kaleidoscope/2020/Documents/Final%20Report/K-2020_Final-Report.pdf), the authors of the award-winning papers shared the prize fund of CHF 6 000.

The paper, "Network Control and Management Automation: Architecture Standardization Perspective," is an updated version of the winning paper presented at the conference. The latter was co-authored by Ved Kafil and AbuHena Al Muktadir under the title "Automation of Computational Resource Control of Cyber-physical Systems with Machine Learning." Ved P. Kafil is also the principal author of the revised paper with colleagues from the National Institute of Information and Communications Technology, Tokyo, Japan: Takahiro Hirayama, Takaya Miyazawa, Masahiro Jibiki and Hiroaki Harai. As requested at the conference, the revision covers the standardization of artificial intelligence (AI) and machine learning (ML) techniques currently in progress in several standards development organizations (SDOs) such as the ITU, the European Telecommunications Standards Institute (ETSI), and the 3rd Generation Partnership Project (3GPP). A set of related open issues are also presented.

In conclusion, we would like to thank the reviewers listed below for their assistance.

- Demo Souza, Richard Federal University of Santa Catarina, Brazil
- Gyu Myoung Lee, Myoung Liverpool John Moores University, United Kingdom;
- KAIST Institute for IT Convergence, Korea
- Kassab, Rahif King's College London, United Kingdom
- Ko, Namseok ETRI, Korea
- Noboro Tominaga, Eduardo University of Oulu, Finland
- Skarmeta, Antonio Universidad de Murcia, Spain
- Yang, Peng Singapore University of Technology and Design, Singapore

AWARD CEREMONY

ITUKALEIDOSCOPE
ACCRA2022

AWARD COMMITTEE

Award Committee Chair: Alessia Magliarditi, ITU Kaleidoscope Coordinator

AC Members:

- 1) **Mostafa Hashem Sherif**, K-2022 Technical Programme Committee Chair
- 2) **Martin Adolph**, Telecommunication Standardization Bureau, ITU
- 3) **Eva Ibarrola**, University of the Basque Country, Spain
- 4) **Kester Quist-Aphetsi**, Ghana Communication Technology University, Ghana
- 5) **Martin Mabeifam Ujakpa**, Ghana Communication Technology University, Ghana
- 6) **Abdul-Rahman Ahmed**, Kwame Nkrumah University of Science and Technology, Ghana

FOUR NOMINEES

- Best ranking papers that were recommended for best paper award by the **Technical Programme Committee** (double-blind/peer-review process) and **Steering Committee**.
- **Four candidates**
 - One in **Track 1** (Network infrastructure and architecture enabling ubiquitous communications)
 - One in **Track 2** (New applications and services)
 - Two in **Track 3** (Enabling technologies)

Suggested (non-exclusive) list of topics

- Track 1:**
Network infrastructure and architecture enabling ubiquitous communications
 - Design, requirements, architectures and protocols for immersive systems
 - System architectures for augmented reality (AR), mixed reality (MR), virtual reality (VR), extended reality (XR), and immersive live experience (ILE)
 - Future mobile and wireless communications (5G and beyond)
 - Networking and multimode connectivity
 - Integration/exchangeability of processing storage and communication
 - Real-time performance and network latency aspects
- Track 2:**
New applications and services
 - Ubiquitous communications in arts, gaming, leisure, sports and in the media
 - Immersive live experience in business, education, information, health commerce and entertainment
 - Evolution of manufacturing and industrial production systems
 - Urban/geo planning and ecosystem services
 - Applications and services of new Web technologies (Web3.0)
- Track 3:**
Enabling technologies
 - Artificial intelligence (AI) and machine learning
 - Data processing and management
 - Interoperability
 - Video coding and streaming
 - Omnidirectional, 360-deg, immersive video, spatial audio
 - Conversational and speech interfaces
 - Visualization techniques, display technologies (e.g. head-mounted display, eyewear, smart watches, projectors)
 - Touch, tangible and gesture interfaces
 - Digital twins, spatial computing
 - Multimodal input and output, localization, spatial registration and tracking
 - Quality of experience (QoE) aspects and assessment

- Track 4:**
Security, privacy and trust
 - Security architectures, trust, identity management, privacy protection mechanisms
 - The ergonomics of cyberattacks and security threats
 - Emerging privacy and security threats in cyber spaces
 - Threat models and attack strategies
 - Security applications and management
 - Distributed ledger technology, non-fungible token (NFT)
- Track 5:**
Socio-economic and ethical aspects
 - Standards, regulations and policies
 - Evolution of standardization for AR, MR, VR, XR, ILE
 - Ethical and legal issues in the new realities
 - Socio-economic implications

Call for Papers

NOMINATED PAPERS AND PRESENTERS

S2.1 A framework for the design, implementation and evaluation of a multi-variant Augmented Reality Application
Sophie Westfahl (University of Applied Sciences Neu-Ulm, Germany); Dany Meyer-Renner (University of Applied Sciences Neu-Ulm, Germany); Antoine Bagula (University of the Western Cape, South Africa)

S2.2 Enhancing user experience in pedestrian navigation based on Augmented Reality and landmark recognition
Dhananjay Kumar, Shreayaas Iyer, Easwar Raja and Ragul Kumar (Anna University, MIT Campus, Chennai, India); Ved P. Kafle (National Institute of Information and Communications Technology, Japan)

S2.3 The knowledge graph as the interoperability foundation for an Augmented Reality application: The case at the Dutch Land Registry
Alexandra Rowland and Erwin J.A. Folmer (University of Twente & Kadaster, The Netherlands); Tony Baving (Kadaster, The Netherlands)

S3.3 A comparative analysis of Augmented Reality frameworks aimed at diverse computing Applications
Mfundo A. Maneli and Omowunmi E. Isafiade (University of the Western Cape, South Africa)

CRITERIA

- 1 – Clarity
- 2 – Relevance to the conference theme
- 3 – Significance to future standards
- 4 – Presentation

BEST PAPER AWARDS

- **First paper:** ITU Certificate + CHF 3 000.-
- **Second paper:** ITU Certificate + CHF 2 000.-
- **Third paper:** ITU Certificate + CHF 1 000.-

And the winners are...

ITUKALEIDOSCOPE
ACCRA2022

3rd BEST PAPER AWARD

A framework for the design, implementation and evaluation of a multi-variant Augmented Reality application

Sophie Westfahl

University of Applied Sciences Neu-Ulm, Germany

Dany Meyer-Renner, University of Applied Sciences Neu-Ulm, and
Antoine Bagula, University of the Western Cape, South Africa

ACCRA2022

6 YOUNG AUTHOR RECOGNITION CERTIFICATES

- **Zicheng Wang** and **Yetong Wang** (Inspur Communications Technology Co., Ltd., China) - S1.2 Towards computing and network convergence: QoE-oriented service anycast based on SRv6
- **Sophie Westfahl** (University of Applied Sciences Neu-Ulm, Germany) - S2.1 A framework for the design, implementation and evaluation of a multi-variant Augmented Reality application
- **Alexandra Rowland** (University of Twente & Kadaster, The Netherlands) - S2.3 The knowledge graph as the interoperability foundation for an Augmented Reality application: The case at the Dutch Land Registry
- **Xiangyu Qu** (Zhejiang Dahua Technology Co. Ltd, China) - S3.2 Research and standardization requirements for 5G network peak control technology in video transmission
- **Mfundo A. Maneli** (University of the Western Cape, South Africa) - S3.3 A comparative analysis of Augmented Reality frameworks aimed at diverse computing applications
