

ITU WI-FI Terms of Use

By accessing and using the ITU Wi-Fi networks, you agree to these terms of use, as may be amended by ITU from time to time. If you do not agree, do not use the ITU Wi-Fi networks. Access to and use of the ITU Wi-Fi networks is provided without prejudice to ITU's privileges and immunities under international and national laws.

Accessing the ITU Wi-Fi networks

User authentication is necessary in order to connect a compatible wireless device to the ITU Wi-Fi networks. The login (computing account)/password combination ("credentials") identifies a single user and is reserved for that user only. You remain solely responsible for the use of the network and the online activities conducted using your credentials. Consequently: i. you should never disclose your login password to anyone; and ii. you should never leave your wireless enabled device unattended while logged-in. Any use of the ITU Wi-Fi networks performed using your credentials shall be deemed to be made by you.

Network security and disclaimer regarding the use of ITU Wi-Fi networks

ITU Information Services Department (ISD) takes reasonable measures, precautions, and actions to provide reliable and secure access to the internet via its Wi-Fi Networks and to prevent illegal or unacceptable uses under the present terms. Such measures include, without limitation, the implementation of intrusion prevention systems (IPS) and firewalls, as well as network monitoring and logging of connectivity data. Any data processing performed by ITU in this context aims to achieve only the following purposes: (i) safeguarding network security and integrity; (ii) improving reliability and network performance; (iii) conducting maintenance, capacity planning, and auditing; and (iv) preventing or stopping illegal or unacceptable uses in accordance with the section below. Correspondingly, ITU ISD may, *inter alia*, limit or restrict access to specific users, devices, websites, and services, and/or implement bandwidth quotas towards achieving the aforementioned purposes.

Despite such measures, precautions and actions taken, ITU cannot guarantee that access to the internet via the ITU Wi-Fi networks will be continuous, fault-free, reliable or secure at all times. You acknowledge that there are security, reliability and confidentiality risks inherent in accessing or transmitting information through the internet. Security risks include, without limitation, interception of transmissions, loss of data; and the possible intrusion of viruses and other programs that can corrupt or damage your data and/or devices when connected to the Internet.

Accordingly, access and use of the ITU Wi-Fi networks is provided "as is", with no guarantees or warranties of any kind, including that the Wi-Fi networks will function always without interruption, faults, or security incidents. You are solely responsible for protecting your devices and your data when using the ITU Wi-Fi networks and assume the risk of any and all damage or loss from use of, or inability to use the ITU Wi-Fi networks.

Using the ITU Wi-Fi networks

It is your responsibility to use the ITU Wi-Fi networks responsibly and in compliance with applicable laws.

While using the ITU Wi-fi network you must refrain from:

- interfering with the security, integrity, and/or performance of the Wi-Fi networks and other ITU networks and equipment, as well as interfering with third party devices connected to the Wi-Fi networks;
- Creating or disseminating malware (e.g. viruses, worms, trojans, dialers, keyloggers, etc.)
- Intercepting third-party communications and/or data;
- Falsifying, forging, or otherwise misrepresenting your or your device's identity;
- creating, communicating, or distributing fraudulent, obscene, offensive, indecent, derogatory, or pornographic content;
- engaging in conduct which is abusive, threatening, defamatory, or intimidating, or which could be considered as harassment;
- sending unsolicited bulk and/or commercial messages;
- using software or applications which may result in high-bandwidth consumption and interfere with the ability of third parties to effectively use the Wi-Fi networks;
- infringing or misappropriating the intellectual property rights of third parties;
- committing illegal or criminal acts;
- attempting or facilitating any of the acts above.
